

To: Coloradans

From: Phillip Villard, Candidate for Colorado Secretary of State

Dear Coloradans:

I am running for the Office of Colorado Secretary of State in the November 2018 elections. The reason why is that, I have seen first hand the devastation that mechanization and outsourcing jobs can do to a community. I've been on both ends, first as an employee in which I was fired and second as a business owner faced with the reality of lowering operational expenses. When I was fired as an employee I strongly disagreed with that decision and as a result I wrote a book on wrongful termination. When I was a business owner I was appointed as the Chair of the Aurora Colorado Business Advisory Board, in which I used that platform to help our local government assist the business community in creating jobs. I'm originally from Pennsylvania where I was a Democrat located in a Republican area. I moved to Colorado because my son's Mother moved them out here and I hated the separation from them. So I packed up my two-cent car, my dog , clothes and headed across country.

Helping people and businesses create profitable relationships is one of the driving forces in my adult life. As I recently decided to run for office in the beginning of 2017 and since that time, I have been funding my campaign myself and have found that I need more resources to reach everybody in the state. Knocking on doors and making phone calls are some of the things that we can accomplish by you donating your time. However there are multiple tasks that are going to require your financial help as well, like buying ads, sign design, printing cost and the list goes on and on. By making a charitable contribution to the Villard Campaign, you not only are helping me help Coloradans make Colorado a great state to do business in, but you are also going to help make the changes we can believe in to better our Counties, our State and the Country. We have made it easy and secure to contribute anywhere between \$5.00, \$10.00, \$15.00 or more depending on your situation. As a Coloradan you already have an interest in supporting your community and some of the decisions that affect you will undoubtedly affect everybody in and around your county.

I personally am tired of all the partisanship and infighting between the two major party's and want it to stop. The thinking, "My way or the highway" only hurts people and won't advance our country as a whole. To stop the partisanship there are things that you can do to help, you can talk to your neighbor and get their prospective on things, attend town hall meetings, talk to your elected officials and tell them your opinions on how you are willing to compromise on certain issues and lastly, stay engaged and don't give up!

Together we can continue what works in Colorado and change what needs to be fixed. Without you and your generosity, it just wouldn't be possible. I have already done a lot on my own but there is much more that we still can get done together. Your support matters!

On behalf of the Villard Campaign,

Thank you so much for your support!

Sincerely,

*Phillip Villard*, Candidate for Colorado Secretary of State
